

Basejet stands for:

High reliability

Reliable production

Consistent quality ensures reliable, reproducible results.

Ideal for extra-wide formats

High paper stability guarantees reliable, efficient productions with extra-wide runs of up to 3.2 m.

High efficiency

Short production times

Fast drying properties and shorter transfer times support high-speed processes.

Low ink consumption

Minimise ink consumption without losing good colour gamut for light designs.

Cost savings

Cost leadership supports cost-driven processes.

Basejet optimises your cost leadership

Our mission

Your success is our desire.

Our uncoated paper grades for dye sublimation are the latest to our product range, covering the needs for light designs and low-ink applications. They are used in high-efficiency productions at lower costs. These ultra-light papers perfectly meet the requirements for cost-driven processes.

We always strive to meet current and future market requirements by continuously investing in enhancing our dye sublimation paper portfolio. Our goal is to produce papers that are suitable for all standard printing systems and inks, providing perfect results and ensuring repeatability throughout the entire production process.

Professional support

In addition to our consistent high-quality papers, we support you by optimising your entire production process, allowing you to get the best-possible results at optimum costs.

Your sustainable partner

Sappi uses natural, renewable resources to create sustainable consumer products for our society. We are driven by sustainability and incorporate it into all aspects of our operations.

Our Basejet uncoated dye sublimation papers are available with FSC™ (FSC™ Co15022) certification and offer a sustainable printing medium.

PLOTTER AND INDUSTRIAL PRINTERS	PROPERTY	PRODUCT NAME DESCRIPTION	GRAMMAGE G/M²	APPLICATIONS	INK LOAD CAPACITY
	Excellent fit for purpose	Basejet Uncoated dye sublimation paper enables controlled, reproducible results thanks to a very smooth, closed printing side. This paper is designed for high productivity processes combined with cost leadership.	20, 30, 40, 50	<ul style="list-style-type: none">FashionHome textiles	★★★★★

Fast ink drying

Good ink-drying capacity and ink hold-out

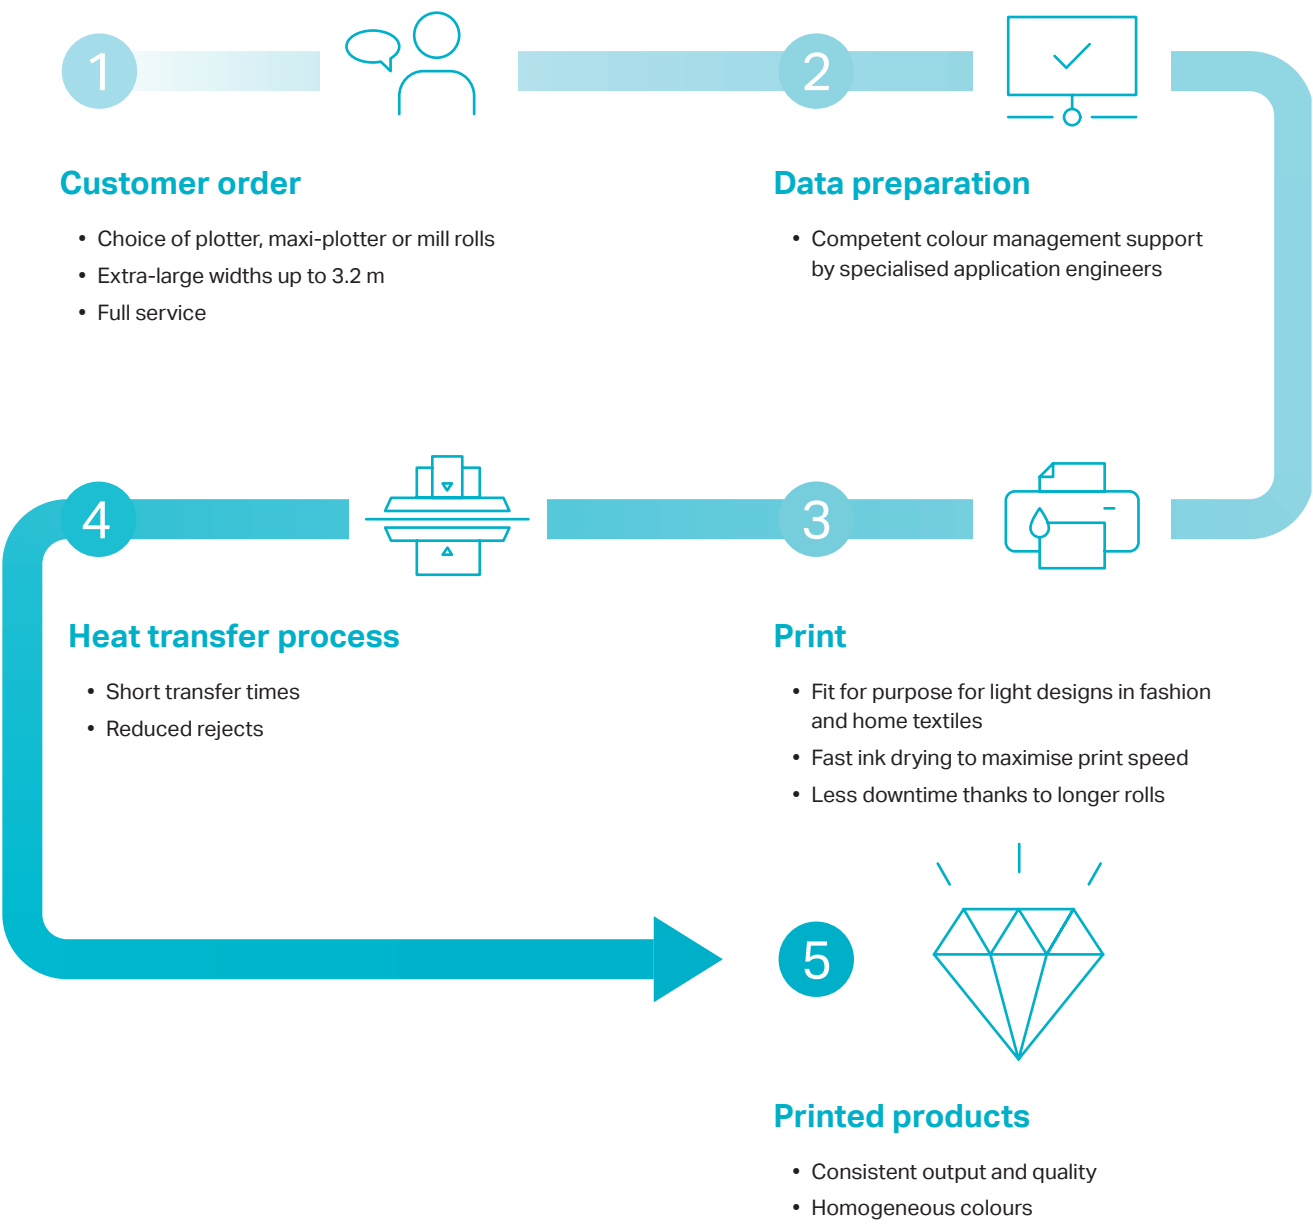

Ultra-light papers

More running metres per roll for longer production runs

Special product features

Benefit from our expertise

Low air permeation for optimum release

Very fast transfer process

Nice, homogenous printing image

Good lay flatness
